

TUG/BARGE, SMALL CRAFT, AND SITE/PLATFORM: WEATHER ADVISORIES

Whether a tug/barge carrying a sensitive cargo across the North Sea, an OSV in the northern Gulf making short supply runs or a FPSO offshore the Nigeria coast; WRI can provide fine-tuned and site-specific weather advisories.

3 to 5 days advance warning for upcoming heavy weather and/or tropical concerns!!!

DOLPHIN WEB-SITE

- Easy internet access from sea or land, via any computer or mobile/internet device with no fancy software.
- WRI messages and exclusive Fleet Forecast Maps with vessel site location.
- Forecast maps depict wind, pressure, visibilities, and seas out to 120 hours.
- Satellite, radar data, and more.
- Tropical advisories/tracks with WRI's analysis and summary.

TROPICAL SYSTEMS

- WRI's continuous expert analysis of ALL tropical systems: disturbances, storms to hurricanes/typhoons.
- Daily WRI Tropical Summary for each ocean basin with continuous communication with land-based staff to minimize impact of tropical threat.
- Specific tropical systems analyzed with respect to vessel/site for potential impact with continuous forecast advice direct to vessel/site.

DAILY WEATHER ADVISORIES

- WRI continuous monitor of the vessel/site with daily tabular forecasts updated whenever changes occur.
- Forecasts include wind, sea, swell (direction, height and period), visibility, temperature (when below 35°F) and any precipitation.
- Experienced maritime meteorologists available 24/7 for phone consultation.
- Plain language synopsis of weather pattern with forecast charts available.

"...thanks WRI for your reports...and very accurate weather information."
