

Meteorologists Available 24/7

Synopsis

A broad ridge of HIGH PRESSURE extending from the Delmarva and across the Carolinas, SW'ward to Florida will tend to remain broad across this region through the morning of the 28th though the ridge will begin to shift inland across the Central Carolinas by the morning of the 29th, breaking down through the morning of the 30th.

Current Conditions

Vaca Key, FL reports ESE winds at 11 kts as of 0500 EDT this morning, while Sombrero Key currently reports SE winds at 10 kts. Land observations at Key West and Marathon report E'ly winds at 05kts and 04kts respectively at the present time.

Severe Weather

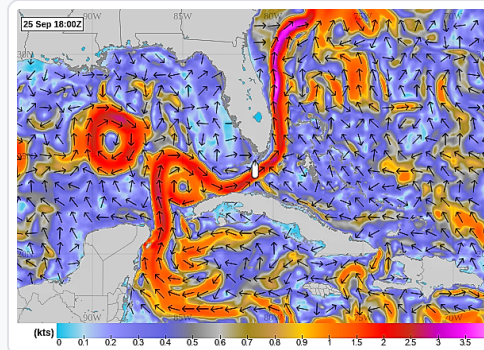

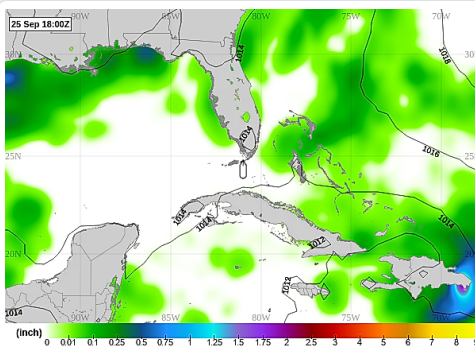

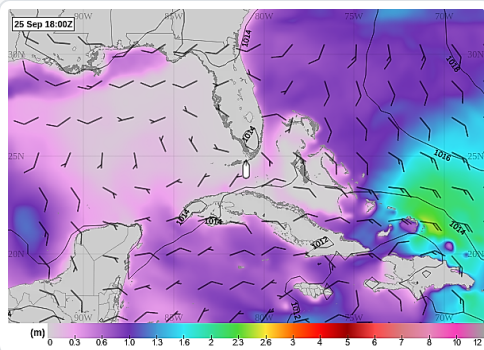

The threat for severe weather is nil for today and tomorrow, while the threat for the following day (the 27th) is low, with isolated squalls likely.

Conclusions

Broad HIGH PRESSURE ridging and weak "gradients" will allow for generally light E-SE-S winds over the next 2 days, with NE-E combined seas on the order of 0.5-1.5 mtrs during that time. In later periods (on the 28th through 29th), winds will back, becoming NE-N-NW as a weak frontal boundary approaches and passes north of the area.
