

Forecast for Pacific Cup

Prepared on Aug 02 14:26Z
 By AA

Synopsis: Good morning. With the last vessels arriving in Hawaii today, we will assume this will be the final forecast update for this event unless we are told otherwise.

A strong **LOW** near 39N/154W with a **COLD FRONT** extending southwest to 30N/170W will track northwest to near 49N/159W by tomorrow morning. The **COLD FRONT** will remain stationary through tomorrow before lifting northeast through the 05th.

HIGH PRESSURE near 34N/134W with a ridge southwest to Eastern Hawaii will drift west to near 34N/145W by the 05th. The ridge will gradually move west over Hawaii through the 05th.

The **TROPICS** remain quiet over the Central Pacific. **HURRICANE** Carlotta is located east of 120W and will track northwest while gradually weakening over the next 4-5 days.

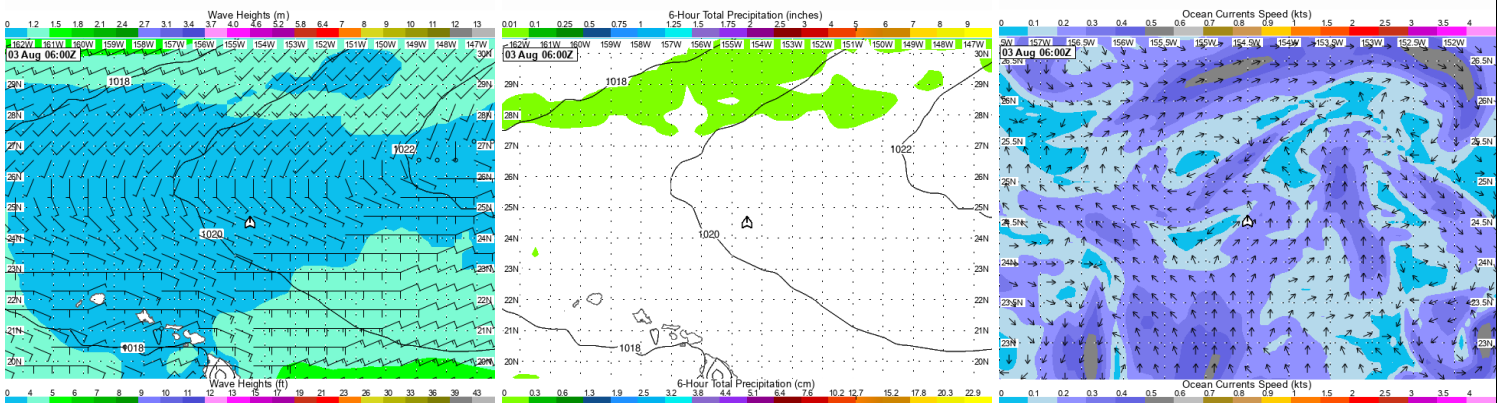

Conclusions: - The **TROPICS** remain quiet near Hawaii. **HURRICANE** Carlotta will remain well to the east.

- Winds and swell will remain highest in the southern most areas of Grids NN and OO today through tomorrow.

- The winds and swell will gradually increase from east to west over Grid NN on the 04th and spread over Grid OO overnight the 04th through 05th due to the building ridge over the region.

- E-NE winds will gradually strengthen and will be highest through passages between the Hawaiian Islands, particularly on the 04th through 05th.
